OVERVIEW

Executive Summary

Combined performance across all four platforms during the reporting period.

KEY HIGHLIGHT

Facebook views grew 35.5% to 598K, driven by a huge jump in 3-second views (+867.1%) and watch time (+453.5%) — paid promotion combined with strong organic pickup on top-performing reels.

PLATFORM SNAPSHOT

Platform	Views	Key Metric	Change
Facebook	598.0K	Viewers: 477,321	+35.5%
Instagram	31.0K	Follows: 92 (Total 1,635)	+55.9% follows
TikTok	8.7K	Likes: 1K	+18.9%
YouTube	6.1K	Watch Time: 52.0 hrs	-

Facebook Performance

Period: Aug 1 – Aug 31, 2026

VIEWS BREAKDOWN (JUL 30 – AUG 31)

Metric	Value	Change
Content Interactions	2.7K	+35.5%
From Organic	20,063	+13.3%
From Ads	577,969	+36.5%
Page Visits	3.1K	+20.6%

WHAT THIS MEANS

Ad-driven reach dominates this month (577,969 of 598K views from ads), while organic growth remains steady (+13.3%). Watch time jumped over 5x, showing the promoted content genuinely holds attention rather than just being served.

TOP INSIGHT

“Achay Insan Ko Zyada Takleef Kyun Milti Hai?” led both views and shares — reflective “why” questions about suffering and fairness continue to be the strongest share-driving format on Instagram.

TikTok Performance

Period: Aug 1 – Aug 31, 2026

STEADY, ENGAGED GROWTH

Every core engagement metric grew this month — views (+18.9%), likes (+22.0%), and comments (+22.2%) all moved together, showing a healthier, more engaged audience rather than a one-off spike.

TikTok — Content Mix This Month

Uploads this month spanned a wide range of reflective and psychology-style Islamic topics — from “Log Achanak Badal Kyun Jaate Hain?” to “Khush Na Rehne Ki Wajah” — consistently pulling 200-350 views per short.

Content Theme	Approx. Views
Log Achanak Badal Kyun Jaate Hain? (Psychology Explained)	224 – 350
Khush Na Rehne Ki Wajah	256
Achay Insan Ko Zyada Takleef Kyun Milti Hai?	277

YOUTUBE TRAFFIC SOURCES

WHAT THIS MEANS

Search remains the dominant discovery channel at 58.5%, though slightly lower than July's 69.3% as Shorts Feed distribution grew to 16.6%. The audience is 98% mobile — every title, thumbnail, and hook should be optimized for a small screen and a scrolling thumb.

YouTube — Top Geographies

Country	% of Views
Pakistan	38.4%
India	27.4%
United States	7.8%
Saudi Arabia	0.1%

WHAT THIS MEANS

Pakistan and India together make up 65.8% of all views, consistent with July. This confirms the core audience remains South Asian, Roman Urdu-speaking viewers — content, references, and cultural framing should keep prioritizing this base while the small US audience (7.8%) suggests some diaspora reach worth nurturing separately.

100,311

COST PER RESULT

Rs 0.03

AMOUNT SPENT

Rs 3,162.14

WHAT THIS MEANS

At just Rs 0.03 per 2-second video view, this campaign delivered over 100,000 views for roughly Rs 3,162 — extremely efficient reach. This directly explains the Facebook views spike (+35.5%) and 3-second views surge (+867.1%) seen this month. This spend-to-reach ratio is worth sustaining or scaling next month.

Content Strategy Insights

Patterns that show up clearly across all four platforms this month.

01

Paid Media Amplifies Best When Paired with Strong Organic

Facebook's 577,969 ad-driven views combined with a 20,063 organic base and a viral 321.2K-view organic post — ads and strong content compound each other.

02

Emotional “Why” Questions Drive Shares

Instagram's top posts (“Achay Insan Ko Zyada Takleef Kyun Milti Hai?”, “Kuch Log Hamesha Unlucky Hoty Hain”) led in shares, not just views — reflective suffering/fairness topics get passed along.

03

TikTok Engagement Is Broad-Based, Not Spike-Driven

Unlike July, TikTok growth this month came from views, likes, AND comments rising together (+18-22% each) — a sign of a steadily warming, more engaged audience.

The month's biggest single win was “Har Baat Dil Par Le Lena” (321.2K views) — a short, everyday emotional-advice title with no complex framing. This is the format to replicate.
